DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 4, drawn to a video packet generating method, classified in class 375, subclass 240.27.
 - II. Claims 2-3 and 5, drawn to a video decoding method, classified in class 375, subclass 240.25.
 - III. Claims 6-13, drawn to a media multiplexer/demultiplexer, classified in class 386, subclass 95.
 - IV. Claims 14-15, drawn to a multimedia communication system, classified in class 370, subclass 310.
 - V. Claims 16-23, drawn to a bit stream converter, classified in class 375, subclass 240.03.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I claims a video packet generating method has nothing to do with the claimed invention of a video decoder or a claimed invention of a bit stream converter.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I, II, III, IV is not required for Group V, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
